

Attorney Docket Number AUS92001055US1
Serial No. 09/888,470
Response to Final Office Action mailed March 8, 2007.

A. Amendments to the claims.

1. (Currently amended) A system comprising:

a user computer connected to a server computer by a network;

a centralized personal data base in a memory of the server computer;

a merchant computer connected to the server computer by the network;

wherein the centralized personal data base is adapted for access by the user computer only when a user inputs a basic number and a primary number and for access by a merchant only when the merchant inputs the primary number and a wallet number;

wherein the centralized personal data base contains a set up program containing instructions, responsive to receipt of the basic number, the primary number, and an account data from the user computer, to cause the server computer to create a wallet number for an electronic wallet;

wherein the centralized personal data base contains a transaction program;

wherein the transaction program contains instructions, to cause the user to provide a primary number and a wallet number to a merchant for a payment transaction;

wherein the transaction program contains instructions to cause the server computer, responsive to receipt of the primary number, the wallet number, and a payment transaction from the merchant computer, to process a payment transaction at the server computer and to transmit a completed payment transaction to the merchant

Serial No. 09/888,470
Response to Final Office Action mailed March 8, 2007.

a wallet set up program in the centralized personal data base program.

8. (Original) The programmable apparatus of claim 1 further comprising a display of the wallet number, an account number and a limit on an account.

9. (Currently amended) A method for remotely completing a financial transaction using a centralized personal data base program comprising the steps of:

providing access for a user to the centralized personal data base only when a user inputs a basic number and a primary number;

providing access for a merchant to the centralized personal data base only when the merchant inputs the primary number and a wallet number;

responsive to receipt of the basic number, the primary number, and an account data from the user, creating a wallet number for an electronic wallet;

providing a primary number and a wallet number to the merchant for a financial transaction; and

responsive to receipt of the primary number, the wallet number, and the financial transaction at the centralized personal data base website, processing the financial transaction and transmitting a completed financial transaction to the merchant;

wherein the wallet number is associated with either a credit card account or a bank account so that the financial transaction is processed without using tokens.

Serial No. 09/888,470
Response to Final Office Action mailed March 8, 2007.

10. (Cancelled).

11. (Previously amended) The method of claim 9 further comprising the step of using the primary number and the wallet number in the financial transaction with a merchant.

12. (Original) The method of claim 9 further comprising the step of selecting accounts to be accessed by a combination of the primary number and the wallet number.

13. (Original) The method of claim 9 further comprising the step of placing a limit on an account that can be accessed by the primary number and the wallet number.

14. (Currently amended) A computer readable storage medium comprising:

a centralized personal data base program in said computer readable storage medium;

wherein the computer readable storage medium, so configured by the centralized personal data base program, contains instructions for causing a computer to

provide access for a user to the centralized personal data base only when the user inputs a basic number and a primary number;

Attorney Docket Number AUS92001055US1
Serial No. 09/888,470
Response to Final Office Action mailed March 8, 2007.

provide access for a merchant to the centralized personal data base only when the merchant inputs the primary number and a wallet number;

responsive to receipt of the basic number, the primary number, and an account data, create a wallet number for an electronic wallet and to register the electronic wallet at a centralized personal data base website;

provide a primary number and a wallet number to a merchant for a payment transaction; and

responsive to receipt of the primary number, the wallet number, and a payment transaction, process a payment transaction and to transmit a completed payment transaction to the merchant;

wherein the wallet number is associated with either a credit card account or a bank account so that the payment transaction is processed without using tokens.

15. (Cancelled).

16. (Previously amended) The computer readable memory of claim 14 further comprising a wallet set up program in the centralized personal data base.
